

# ZERO GRAVITY<sup>®</sup>

WORLD CLASS WINDSCREENS

# MANUFACTURING FOR OVER 20 YEARS.

Zero Gravity® celebrates more than 20 years of manufacturing high quality sportbike windscreens. Since 1989 ZG has distinguished itself as the world's premier windscreen maker and innovator. Since its humble beginnings in a one-car garage, ZG has expanded to now occupy the building you see below, a 25,000 sq/ft state of the art facility located in Camarillo, California. All ZG screens are designed and manufactured in this building insuring the highest quality and manufacturing efficiency. Over the years ZG products have established themselves as the benchmark of excellence. And ZG has helped many race teams win major championships around the globe, pushing the envelope of windscreen design in both performance and aesthetics. So next time you're out on a weekend ride or at the racetrack, keep your eyes open for Zero Gravity windscreens.

The Zero Gravity® Double Bubble® has changed the face of the sportbike industry. This innovative "stepped profile" design, pioneered by Zero Gravity Racing in the mid-90's, has pushed modern day race bikes to their peak performance. Sculpted to the modern day sportbike's futuristic lines, the Zero Gravity Double Bubble enhances the bike's race look while providing added aerodynamics. Inventory available in Clear, Light Smoke and Dark Smoke.

\*Other colors available by special order.

AVAILABLE FOR MOST  
POPULAR SPORT BIKES

- HONDA • KAWASAKI • SUZUKI • YAMAHA

GSXR1000

## SR series

The Zero Gravity SR Series™ is made of high quality acrylic plastic, formed to emulate the original factory screen. SR Series screens feature the best value of any other screens available, especially when compared for their optical quality, fit and finish. Manufactured in the USA, Zero Gravity SR Series screens are factory pre-drilled and designed to fit your OEM fairing using your stock mounting fasteners or our Zero Gravity Wellnut & fasteners kits. Inventory available in Clear, Light Smoke, and Dark Smoke.

\*Other colors available by special order.

## SPORT TOURING

Zero Gravity is proud to present its tallest performance windscreen line. ZG Sport Touring™ screens are designed to reduce windblast and to raise the point at which the wind hits the rider while in the upright riding position. Degree of comfort will vary depending on the rider's physical makeup. Made with the same high quality acrylic as all other ZG windscreens, ZG Sport Touring screens feature superior optical quality as well as fit and finish. Sport Touring screens are pre-drilled to factory hole locations and can be used with OEM fasteners or Zero Gravity Wellnut kits. Available in Clear, Light Smoke and Dark Smoke.

# CORSA SERIES™

Zero Gravity's newest performance windscreen innovation. Designed by Zero Gravity® in collaboration with road racers around the world. This technology provides added wind protection over the stock screen while tucked in at high speed, especially for larger riders. Inspired by the latest in World GP race bike design, this once "Racer Only" windscreen is now available to all riders. Pre-drilled to factory specs, Zero Gravity Corsa™ Series screens are ready to mount using OEM fasteners or Zero Gravity Wellnut kits.

Available in Clear and Light Smoke.

## Windscreen Accessories

### Well Nuts & Fasteners

Replacing your sportbike windscreen? Zero Gravity Wellnut & Fastener Kits are available for most applications. A wellnut kit consists of flanged neoprene bushings with captive grass nut, nylon washers and rounded allen head screws. Available in 9x14 mm and 9x16mm sizes, 4 or 8 count. Also available are nylon fastener kits for un-drilled windscreens, used mostly for race and custom applications. Includes 8 (count) 6mm nylon screws and lock nuts. Visit our website for more information.

### Trim Lok®

Vinyl edge trim manufactured by TrimLok. This easy to install accessory emulates a factory finish and provides a blunt edge for added safety. Internal metal clips provide a secure grip. No gluing necessary. For use on most windscreens up to 1/8" thick. Universal 3 foot length.

### One Step Cleaner & Polish / Novus

APRILIA RS-V4  
FACTORY

Zero Gravity One Step Cleaner & Polish is formulated to maintain your windscreen's showroom look. Cleans quickly without leaving a film and buffs to a brilliant shine. Provides an anti-static quality to the screen and resists finger smudges and dust. Used by the Zero Gravity production team to prep every Zero Gravity windscreen before it is packaged. Offered in a 32 oz. carafe bottle or a convenient 8 oz. spray bottle. Also available is Novus No.2, a fine scratch removal compound that will help maintain your acrylic screen in crystal clear condition. Used by the Zero Gravity production team. Available in an 8 oz. bottle. Visit our website for more information.

### Plastic Drill Bit

Zero Gravity high-speed drill bits are specifically designed to cut through acrylic plastic. For use on Zero Gravity un-drilled race and custom applications. Used by the Zero Gravity production team. Available in 1/4" or 3/8" diameter.
